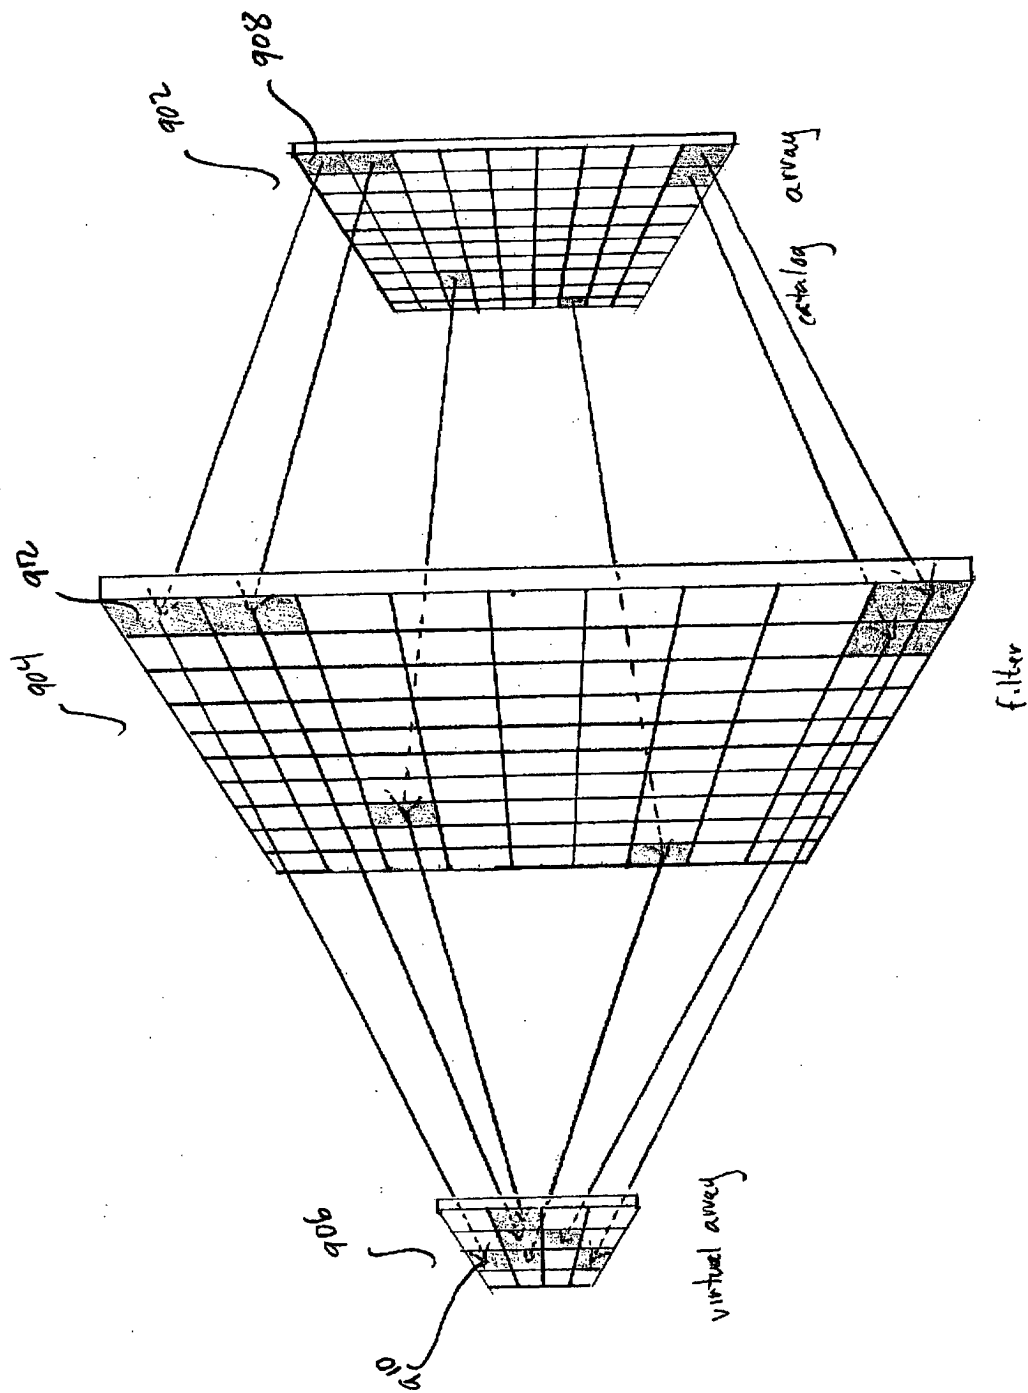

Figure 9

avary location: (36, 17)  
 sequential index: 5419  
 motif/rev function: enzyme catalyst  
 biological process: carbohydrate metabolism  
 cellular component: cytosol  
 name: glyceraldehyde-3-phosphate  
 source: human muscle cell culture  
 note: (+) strand  
 probe sequence: ccccttgacgaagatctcc  
 is masked: FALSE
